

The Warpath

“While traditional cultures and mythology the world over teach us the way of life and service that is a warriors path, the specific term "warpath" is a Native American concept. In the indigenous tradition of North America, being on the warpath does not just mean going to war. It means *walking the path of a spiritual warrior at all times—in war and peace, on the battlefield, and in the village.* Thus the warrior's path is essentially a way of life, and it always includes the teaching and practice of the journey home.”
